

a A window is opened around every phased variant with $PE \geq 0.8$

b Bridge-vertex feature

removing this variant disconnects the window
→ is_bridge = 1

c Centre-zone mask

$$r = |\text{pos} - \text{pos}_c| / \text{max offset in the window}$$

$$\text{kept if } r \leq \min(1, 10 / \text{round}(20 \cdot r_{\max}))$$
